

# DTC1500

**COST-EFFECTIVE, VERSATILE,  
SECURE CARD PRINTING**

**HID FARGO DTC1500**, a flexible and modular direct-to-card printer that cuts costs and strengthens security.

**Customizable watermark feature comes standard on every unit**

## BUILD SECURITY INTO EVERY CARD

**Custom Overlay Watermark** Create a customized, transparent security image — such as a logo, symbol or text — to be integrated as a permanent watermark within the printed card’s overlay panel and make duplication virtually impossible.

**Optional Lamination** Apply overlaminates to further enhance card security and durability.

## ENHANCE PRODUCTIVITY

Ribbons yield up to 700 full-color prints per roll, reducing downtime and increasing productivity.

## VERSATILE CARD APPLICATIONS

Add optional contact and/or contactless card encoding to access a variety of applications:

- **Contactless door entry**
- **Cashless vending**
- **Time & attendance**
- **Gift/Loyalty cards**

## RESIN THRESHOLD FOR TRUE K PANEL PRINTING

With resin threshold, operators can decide when resin should be utilized based on color concentration for darker and more crisply defined text and barcodes.

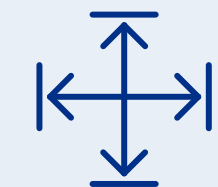

### Earth-Friendly

Designed for efficient energy consumption and support for eco-friendly rewritable cards.

### Improved Security

Inclusive resin scramble data protection hides any information printed with a resin panel while standard password protection and AES data encryption provide additional peace of mind.

### Highly Versatile

Powerful printing in a modular, scalable design — built-in dual-side printing can be activated with the simple use of an RFID tag, making after-purchase upgrades virtually effortless.
