

# NCryptProx PRO

## PROX CARD ENCODING & PRINTING SYSTEM

The **NCryptProx Pro Card Encoding System** delivers a powerful all-in-one solution for secure HID® Prox card encoding. Built on the innovative **NCryptID Prox Card Technology**, this system enables direct encoding of **HID® 26-bit, 35-bit, and 37-bit** cards—providing on-site, on demand card encoding in any quantity.

Featuring a single-sided ID card printer with a pre-integrated **NCryptID** Prox encoder and easy-to-use encoding software, the **NCryptProx Pro** system simplifies Prox card enrollment and management, no third-party tools required.

### SYSTEM INCLUDES:

- Prox Card encoding software and dongle
- Card printer with integrated Prox encoder
- Black ribbon - prints up to 3,500 cards
- 50 Prox cards
- Program HID® 26-bit (H10301), 37-bit (H10304), 35-bit (Corporate 1000™)
- Free 1-year support
- Free 1-year hot swap - registration required
- Custom format available if required
